

# Craft Your Own Beaded Dragonfly

by Trần Thị Minh Phước

## Materials

1 pipe cleaner

22 assorted color beads 10x12 mm

Wings template ( print out in landscape mode)

<p><b>Step 1:</b> Insert one bead into the pipe cleaner and fold in half.</p>	
<p><b>Step 2:</b> Bring the two ends together and insert 10 beads onto it.</p>	
<p><b>Step 3:</b> Separate the pipe cleaner in two and insert 4 beads onto each side. Twist it together to make the body. Add one bead over the two pipe cleaner ends and twist it again.</p>	
<p><b>Step 4:</b> Add one bead (same color) on each side to make the eyes and twist it. Curl the two ends to make the antennae.</p>	
<p><b>Step 5:</b> Cut out and insert the paper wings into the body.</p> <p>Hint: You may need to bend the wings slightly to insert in. Glue the wings to the body.</p>	

And your dragonfly is ready to fly.
