

# Make your own kente cloth

Kente Cloth Pattern side

- Take your copy of the Kente Cloth pattern sheet. Use crayons, markers, or colored pencils to color patterns in each section. Look closely at pictures of Kente Cloth for inspiration. Notice the geometric shapes and bold lines. There is no wrong pattern to include or create.

Kente Cloth Grid side

- Once you have completed coloring the first side. Flip the page over to follow the guides to create your weaving grid.
- First follow the guide to fold the sheet in half
- Next, cut on the dotted lines. Be sure to not go past the solid line.
- Once you have finished cutting, unfold and flip back over to the pattern side.

- Take several strips of colored construction paper in a variety of colors.
- With a black or dark colored marker draw patterns on each strip. Stripes, Zig Zag, Sqiggle lines, dashes etc.

- Finally its time to weave! Weave your construction strips through (over and under) each of the cuts on your Kente Cloth Grid.
- Cut edges of construction paper that are hanging over the grid.

Ta-da! You have made a beautiful Kente Cloth!
